

Decatungstate salts for selective photocatalyzed C(sp³)-H / C(sp²)-H functionalization

Speaker:

Prof. Dr. Maurizio Fagnoni

University of Pavia

Pavia, Italy

Date: Monday, September 9, 2019

Time: 10:30-

Venue: B301 room, School of Science

Maurizio Fagnoni (MF) is currently an Associate Professor at the PhotoGreen Lab at the Department of Chemistry (Organic Chemistry section) of the University of Pavia.

MF is interested on the generation of reactive intermediates e.g. radicals and cations and radical ions by photochemical means. Particular attention has been given to the significance of such mild synthetic procedures in the frame of the increasing interest for sustainable/green chemistry.
