

Symposium on

Future Science by PhotoScience

13:30~16:30, February 21st (Thursday) 2019
B301 room

13:30-13:35: Dr. M. Abe (Hiroshima University, Japan)
opening

13:35-14:15: Dr. K. Saitow (Hiroshima University, Japan)
"Nanomaterials synthesized by physicochemical methods:
enhanced optoelectrical properties."

14:15-14:55: Dr. D. W. Cho (Korea University, Korea)
"Photoinduced Electron Transfer, Charge Transfer and Hole
Transfer in Various Donor-Acceptor Systems"

14:55-15:10: break

15:10-15:50: Dr. T. Haino (Hiroshima University, Japan)
"Luminescent Supramolecular Helical Assembly based on
Flat pi-Conjugated Molecules"

15:50-16:30: Dr. T. K. Ahn (Sungkyunkwan University, Korea)
"A photosynthetic engine to make artificial cells"
